There are no set office hours for this online course, to best accommodate asynchronous learning. If you have questions about the material or the course, please contact one of the above individuals using E-Learning.

COURSE DESCRIPTION

This 1-credit course studies the basic principles of pharmacology and therapeutics in the context of medicine and biomedical science. Concepts are taught using a combination of online lectures and online problem sets. Topics include the types and nomenclature of small molecule drugs and therapeutic biologics, drug-receptor interactions, pharmacodynamics, pharmacokinetics, pharmacogenomics and the basis of personalized medicine.

Concepts are taught using a combination of online lectures and online problem sets. The problem sets are designed to help the student reinforce and understand these fundamental concepts. The ultimate goal is for students to develop an understanding of the core principals of medical pharmacology and therapeutics, as well as the problem solving and critical thinking skills, necessary to study pharmacology and therapeutics in the context of human disease.

COURSE OUTLINE

Videos	Problem Sets/Research Assignments	Lecturer/ Due Date
Course Introduction		Jahn
Drug Discovery		Jahn
Nomenclature		Rowe
	Problem Set 1: Nomenclature	
Translational Research – Overview		Martens
Translational Research – T0 I		Harrison
Translational Research – T0 II		Harrison
Translational Research – T1 I		B. Law

Translational Research – T1 II		B. Law
Translational Research – T2 I		Rowe
Translational Research – T2 II		Rowe
	Problem Set 2: Translational Research	
Pharmacodynamics I		Urs
Pharmacodynamics II		Urs
Pharmacodynamics III		Urs
	Problem Set 3: Pharmacodynamics	
Pharmacokinetics I – Absorption & Distribution		Jahn
Pharmacokinetics II – Metabolism		Urs
Pharmacokinetics III – Excretion		Urs
Pharmacokinetics IV – Quantitative I		Bird
Pharmacokinetics V – Quantitative II		Bird
	Problem Set 4: Pharmacokinetics	
Individual Responses to Drugs I		Rowe
Individual Responses to Drugs II		Rowe
Pharmacogenomics I		Rowe
Pharmacogenomics II		Rowe
Course Wrap-Up		Jahn
	Problem Set 5: Pharmacogenetics	
	Research Assignment: Drug Discovery	
The Final Exam May Be Taken Between		

PREREQUISITES

This course requires a BA or BS and a strong science foundation with at least 5 full semester courses related to biology, chemistry and/or physics.

LEARNING RESOURCES

1. Recorded video lectures with PowerPoint presentations will be provided in E-Learning.
2. Lecture notes for each video lecture are available as PDF downloads in E-Learning.
3. While not required, recommended texts to accompany the online content are:
Goodman and Gilman's The Pharmacological Basis of Therapeutics
 UF students can access the e-book [here](#).

Basic & Clinical Pharmacology by Katzung
 UF Students can access the e-book [here](#).

LEARNING OUTCOMES

Successful completion of this course will prepare students to study pharmacology and therapeutics in the context of translational research and specific human physiologies and pathophysiologies. These students will be able to:

1. Understand the diversity of small molecule drugs and biologics (e.g., antibodies, peptides, viral-based gene therapies), including their nomenclature.
2. Understand the major steps in the process where basic scientific discoveries are applied towards solving medical problems in patients and society (T0-T2) and the types of knowledge needed to progress through these different steps.
3. Describe the process of identifying an unmet medical need and identify how scientific knowledge or discoveries might be used to improve upon existing therapies.
4. Understand the mechanisms by which drugs and biologics act in the body and at their targets (e.g., pharmacokinetics, pharmacodynamics, affinity, agonism, antagonism)
5. Demonstrate the ability to apply pharmacological principles of clinical and basic science relevancy by multiple choice examinations, research assignments, and quiz exercises.

GRADING SCALE

A numerical grade will be given at the end of the course and will be scored as follows, per University of Florida standards (<https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx>):

93-100% = A
90-92% = A-
87-89% = B+
83-86% = B
80-82% = B-
77-79% = C+
73-76% = C
70-72% = C-
67-69% = D+
63-66% = D
<63% = E

FINAL GRADE CALCULATION

Your final grade will be calculated as below:

50% Problem Sets
20% Research Assignment
30% Comprehensive Final Exam

1. Problem Sets: 50%

- a. The course content is structured into groups of lectures that are accompanied by problem sets.
- b. Problem sets may require basic calculations or interpretations of data figures describing the action

of drugs or other therapeutic agents along with testing general comprehension.

- c. They are open book.
- d. Each problem set has its own due date, which is available in E-Learning.
- e. Points will be spread evenly over all questions for the entire semester.

2. Research Assignment: 20%

- a. There is one Drug Discovery Research Assignment, which is designed to help the student integrate the concepts of pharmacology and therapeutics with the preclinical and clinical stages of drug discovery as related to human disease.
- b. This assignment is an original paper that explores an area of pharmacology relevant to the focus of the course (in this case, Drug Discovery).
- c. The specific focus of the paper should be approved by the course director prior to beginning.
- d. The paper should cite authoritative sources such as the primary scientific literature and informational websites of government agencies.
- e. This assignment is due on the date indicated in E-Learning and a scoring rubric is included with the online assignment.
- f. All submissions will be submitted to Turnitin to check for originality.

3. Final Exam: 30%

- a. There will be one cumulative exam covering the material taught in all of the lectures.
- b. This exam will be multiple choice.
- c. The exam may be taken any time during the window of availability; however, it can only be taken once.
- d. You must set up online proctoring for this exam as described in the following section.
- e. If you are in the process of taking the exam when the scheduling window closes, it will automatically submit and you will not be allowed to complete the rest of the exam.

EXAM PROCTORING

The exam will be monitored by ProctorU, a UF chosen service that allows the students to complete their exams at home while still ensuring academic integrity. Students will make the arrangements for exam proctoring. But all standard costs of the exam are covered in the registration costs. Last-minute appointments with ProctorU to take the exam may incur extra costs that are the responsibility of the student.

ProctorU is a live online proctoring service that allows you to take your exam from the comfort of your home. ProctorU is available 24/7, however, you will need to schedule your proctoring session at least 72 hours in advance to avoid any on-demand scheduling fees. Creating a ProctorU account is simple. You can do so by visiting go.proctoru.com.

In order to use ProctorU, you will need a high-speed internet connection, a webcam (internal or external), a windows or apple operating system, and a government issued photo id. ProctorU recommends that you visit <https://test-it-out.proctoru.com/> prior to your proctoring session to test your equipment. We recommend you click on the button that says “connect to a live person” to fully test out your equipment.

Additionally, please visit and review the test-taker resource center [here](#). You should expect the startup process with the proctor to take about 10-15 minutes. However, this time will not affect your exam time. Please feel free to direct any questions to the student support team via the live chat within your account.

MAKE-UP AND LATE POLICY

There are no make-up exams unless otherwise granted by the course coordinator prior to an examination date. Failure to take an exam without prior permission from the course coordinator will be recorded as 0.

Problem sets may be completed late up until final grades are posted. A penalty of 50% will be applied to each late problem set.

Research assignments may be turned in late. These assignments will accrue a 5% penalty for each calendar day they are late. They may be turned in until all possible credit has been lost due to the late penalty or final grades are posted, whichever occurs sooner.

ACADEMIC HONESTY

Please review the complete policy of the University of Florida regarding academic dishonesty, found in the online student handbook at: <http://graduateschool.ufl.edu/media/graduate-school/pdf-files/handbook.pdf>. Students are expected to abide by the University of Florida Academic Honesty Guidelines and to adhere to the following pledge: We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment."

ACCESSIBILITY

Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, <https://www.dso.ufl.edu/drc>) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodation. Students with disabilities should follow this procedure as early as possible in the semester.

IMPORTANT NOTICE ABOUT PLAGIARISM

Plagiarism is not tolerated at the University of Florida. The University of Florida has an honor code that defines plagiarism as follows: Section 3a: Plagiarism. A student shall not represent as the student's own work all or any portion of the work of another. Plagiarism includes but is not limited to:

1. Quoting oral or written materials including but not limited to those found on the internet, whether published or unpublished, without proper attribution.
2. Submitting a document or assignment which in whole or in part is identical or substantially identical to a document or assignment not authored by the student.

Please note that intent is not an element of this kind of violation so it is important to take great care to complete the written assignments in your own words. The first incidence of plagiarism, which will be reported to the University, may be punishable by a maximum penalty of a "0" grade for the assignment. Subsequently, a second academic honesty infraction can result in expulsion from the University.

For a complete description of the UF Honor Code and procedures, please visit: <https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/>.

For a good discussion about plagiarism and how to properly cite your sources, please visit: <http://mediasite.video.ufl.edu/Mediasite/Play/adaa44500eaf460a84f238e6b9a558f9> .

COURSE EVALUATION

Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at <https://gatorevals.aa.ufl.edu/students/>. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via <https://ufl.bluera.com/ufl/>. Summaries of course evaluation results are available to students at <https://gatorevals.aa.ufl.edu/public-results/>.
